

REVISED August 13, 2024 -- Net use instructions:

1. There are two courts. Only one is configured for *both* tennis and pickleball.
2. The “*Tennis Only*” court has the net set at regulation height. The **center net strap is set to 36” tennis height and** prevents “whipping” and damage in windy conditions. The strap should not be readjusted and should always remain hooked down.
3. The Tennis/Pickleball court utilizes **one center net strap** to set the net at **36” tennis height and a second strap to set the net at 34”** pickleball height. To play tennis or pickleball switch the center net strap hook to the desired strap (pickleball strap is labeled). **The straps should not be readjusted. Please keep one strap hooked down at all times to** prevent damage to the net.

*Thank you for helping to keep our nets in good order and undamaged.
